

To whom it may concern,

I am deeply troubled by your plan to remove the protection status of 50% of our protected areas. If anything, we should be ADDING to it, rather than taking it away. As such I ask you on a human level not to do this, both for our country and future generations. Don't act like this think you won't be around when the issues that you create come around, because believe me, the Australian public WILL hold you accountable by not voting for you in upcoming elections. Heed my warning! I hope you make the right, ethical opinion.

Regards, Kelvin Montanaro, Australian citizen
