

I am appalled at the backward step this government has taken in view of our Marine Sanctuaries! They are there to serve a purpose to protect our Marine life and Australia's oceans from pollution and over fishing!

Do you not care for the legacy you will leave behind? For your children and grandchildren to inherit! Maybe you should listen to the people who voted you in not the big multinationals who just want to make a quick buck at Australia's expense!

Once it's gone it's gone for good. Think beyond short term money making consider the depth of destruction your decision will cause!

Think carefully

Helen
