

Dear Sir/Madam

Re: Marine Park Protection

I am shocked that the Turnbull Government wishes to cut back protections on our Marine Parks. In an era where the oceans need more protection than ever, any cutbacks on protection should not occur. The oceans are facing more and more threats from coral reef bleaching and damage from mining such as coal ports and drilling. I submit that there be no cut backs to any marine parks in Australia. We need more protection of these precious areas not less. The science shows that less protection will harm habitats and harm Australian wildlife. Sustainable regional development will also be harmed. Please do not decrease any protection on our precious Marine Parks.

Yours faithfully

Susan Carden
