

Dear Tony,

I have voted for your coalition because I believe in progress, empowering people with their life and the importance of values for societies to thrive.

Culture and civilisation emerge from their environment and their ability to use natural resources sustainably.

Reducing the protection of our most precious environment asset, the ocean, is not just a short term political and economic miscalculation to please the masses or financial interests, it is suicidal and irresponsible.

As a leader of our nation, please choose the good fights, those that you will be remembered for by people after you. Make a stand by choosing life over destruction, celebration over greed, nature over artifice. If you believe in God, protect marine life like you would protect the life of your owns, because we all depend on it.

Be remembered for the right reasons,

Your sincerely,
Frank Peylaire
