

Good Afternoon,

I wish to protest re the planned reduction in marine parks.

No Australian government has ever reduced marine protection like the current one.

I also strongly object to the re-introduction of mid water trawling & the possible re-introduction of long-lining in the Coral Sea.

Having dived on Osprey Reef, a world class dive site, sites like this need all the protection they can get.

I sincerely trust the government's planned reduction to marine parks will be treated with the derision it deserves.

Leighton Dadds.
