

Dear Sir/Madam

Please do not reduce protection of our oceans, they need to be protected and preserved from perpetrators who's first interest is financial gain who have no interest in the value & long term benefits our oceans are to Australians. Please do not reduce protection of our oceans by 50% which I understand is your intention. Our ocean's are unique and should be 100% protected for there value and future generations.

Yours sincerely

Susan Brittain
