

Sirs

This voter is horrified by the cutbacks being proposed around Australia. The oceans are in trouble from man's abuse in many ways and need protection NOW .

We are on the tipping point with the world's oceans - extending our marine sanctuaries is a MUST - not reducing them!

The earth is in view of its 6th extinction event. The first one man will suffer from - and will have caused. When the oceans die - man will die. We should be protecting them for our own species who are dependent on everything we are destroying.

The oceans are the earth's lungs! Not to mention our surrounding ocean fills Australias pockets.

MARINE TOURISM

PROTECT AND EXTEND OUR SANCTUARIES NOW ..... PLEEEEAASE

Linda Kemp
