

I'm a voter and I care about the environment and protecting it from anything or anyone who would cause it damage.

I'm not really happy how this government in particular put profits above the environment.

Cutting marine protection is such a shortsighted thing to do when it has taken decades to establish them in the first place.

Don't be like Trump. What has been hard fought for and won should continue to be protected.

Be a leader in conservation. Stand out in the world for doing something that is not only beneficial for the environment, but is the right thing to do.

Politicians will be remembered for the good that they do. Don't be remembered in the history pages as an environmental criminal.

If your party won't protect the environment, native animals, forests and oceans, then I'll find a party that does.

Regards,
