

To whom it may concern..

I am strongly objecting to the proposed cutting of all Australian marine parks & reserves, now & in the possible future..

Also to the addition of all commercial fishing - mid trawling & longlining in these areas aswell..

A rediculasly stupid, thoughtless act by this disjointed government..

Wake up & do something environmentally constructive for a change, for the future of Australia & this whole planet we all live on, which needs to be respected & nutured..

Looking forward to seeing some positive changes implemented & stupidity abolished!!
