

To whom it may concern,

Marine sanctuaries and fishing exclusion zones are extremely important to protecting and ensuring ongoing health of the unique ecosystems so future generations can enjoy.

All thoughts about mining or mineral exploration in such zones is not worth the small amount that will be gained in profits or benefits that will come of this.

Please keep the marine sanctuaries set up by previous government in place

Remember once we loose the marine habitat its gone forever

Thanks from hearing my petition to you

Regards

Chris
