

Hi

Please don't reduce Australia's Marine Parks, please if anything make them bigger or join them together to create corridors and an entire network of underwater havens. Our oceans are our life and they need protecting.

The ocean and its wildlife is not an endless supply that we can just keep fishing, we need a comprehensive plan to save this fragile ecosystem. Fishing and tourism industries need this as well to protect their livelihoods, so do the right thing by every Australian.

Thanks
Jen
