

To Whom it May concern

This brief submission is to request that the Government cease winding back ocean protection. In a world where the term "plenty more fish in the sea" no longer has any veracity, where fish stocks are decreasing and coral reefs dying we need more than ever to preserve and protect our marine environments. That which we do not protect we risk losing. Our children and grandchildren deserve to have the natural environment protected so they too can enjoy the fruits of the ocean in terms of food and recreation.

Please don't let Australia be the benchmark of failure in protecting the oceans.

Yours sincerely

Dr Helen Ritter
