

I am writing to you, in absolute shock to be honest , that such a huge portion of our beautiful marine sanctuaries are being reduced it actually beggars belief that it is even being considered im hoping that common sense prevails over money and this is not allowed to happen but I very much doubt it people in power seem to be only interested in whatever kickback they will receive by condoning it and have no interest in protecting our country for future generations... hopefully I'm wrong Thankyou Annette Mason
