

What will this govt be remembered for?

If our oceans aren't protected they will be degraded. What type of legacy do we leave our children & grandchildren? Greedy corporations don't care about the future of our oceans. Huge factory fishing ships will destroy our oceans, then just move on to destroy other oceans.

Members of the Federal Government have children and grandchildren. What will they say to them when our oceans are destroyed for greed? What apology will make it right, that short-sighted companies were allowed to destroy the coastline and marine habitats? Future generations may need to look up books to see different species because they were allowed to become extinct. Vandalism, aided and abetted by irresponsible, uncaring politicians, disgraceful, shameful !!

Please don't let this happen.

Kerry Oldfield
