

Dear Minister Frydenberg,

I encourage all my friends and colleagues to cut back voting for a Member of Parliament and for a government for what ever reason, is planning to cut back protection of Australia's wonderous coral reefs, The Coral Sea and The great Barrier reef.

What are you thinking of? These areas are one of Nature's pristine miracles and as such should be preserved for the sake of the economy and for our children's future. And not disposed of for the sake of a few miserable dollars.

These areas are priceless for our Nation, for the sake of our standing in the world and for generations to come.

Please reconsider your plans and let Australians hold up their heads in the world
Do not destroy our reefs, and our seas.

Yours Faithfully
Helen m.Harper
