

I do not know what is wrong with the government we have at present but it seems they are trying to self destruct. There is not a week goes by that I am not writing something to object to their incompetence. They really are unbelievable in what they are doing. The Adani mine is the most extraordinarily stupid thing to start with and the pollution that this mine will create is horrendous. Another thing is the quality of life (or no life) for the marine creatures that live in the reef area and surrounding areas. You must somehow get through to them that this is distrastrous for us all and for those that live elsewhere and love coming here to see this beautiful reef and the colourful fish and creatures that live there. I cannot stand for this awful thing to happen and to bring back outmoded ideas because they cant think of anything else is crazy. Please do not do this, I beg you to reconsider and make the Australian people happy.
