

Marine Parks Management

I write briefly but forcefully to lodge my strongest protest at the proposed cuts to Marine Parks

Any cut is a short term grab to shore up a few disgruntled businessmen whose sole aim is self interest. It is time for planners to display foresight and a genuine concern for our environments and the rights of future generations to have access to a few pristine area of marine parks.

In the longer term such action will result in far greater financial returns for our economy than this short term gain and we will still have our parks into the future.

No cuts should even be contemplated.

Yours sincerely
