

Dear Sir/Madame,

I am writing to protest at the cutback of marine parks. The ocean is being plundered and abused as we talk. Just because the damage is out of sight and underwater does not mean it is un-noticed. The ocean is sick [acidification of its waters due to climate change], and its ecosystems are under massive commercial and recreational pressure. The marine parks provide "increase sites" where marine life can safely grow and breed unmolested. Then the excess marine life spills out of the marine park, and is available for harvest, Dont kill the goose that lays the golden eggs.

Keep our marine parks.
