

What a disgrace to put forward a plan to have the largest cut back of Marine Parks in our Australian Oceans. I did receive a petition from a couple for me to sign, claiming it would hurt their recreational fishing, I did not sign. I do have a very keen fishing family & after a discussion on the subject they agreed if our Marine life are protected it enables them to breed & flourish. Sure they will be unable to fish in Protected Marine parks, but they realise the protection of our marine life will mean an abundance of recreational fishing, for us now & also future generations. Our Marine Parks must not be cut back. Cheryl Kneipp
