

To whom it may concern,

Please please please do not proceed with the reduction of the marine parks in Australia. Many of our precious marine life are already at the brink of extinction and require our protection not facilitation of their destruction. This decision is irreversible in the impact it will have. Our future generations will look back with horror at decisions like this. Our valuable tourism industry depends on intact marine parks to remain prosperous and trawling these oceans will not be sustainable in the long term anyway.

Please listen to your constituents who are speaking for those who cannot speak for themselves.

Regards,

Robyn Brown
