

I am writing in regard to the planned cutback to Australia's marine protection.
I do not support ANY cutback to marine protection and I could support any government that does.
These areas are of significant importance environmentally, for tourism and public enjoyment. Some
are already under stress and cutbacks will only make things worse.
I simply cannot believe that such unconscionable cutbacks are even being considered let alone
planned.

I urge you to leave these protections in place.

Yours faithfully

Anthony Buckley
