

Dear Sir or Madam,

I write to voice my opposition to reduction in area of our Marine National Parks.

At a time when the Reef is already under stress from climate change it seems extraordinarily irresponsible for the government to be reducing the protections of one of our most precious natural assets.

We have previously been applauded by the global community for actions in protecting our Marine environment,

It is incomprehensible that the Turnbull Government will want the removal of these parks as its environmental legacy.

Yours Faithfully,

**Daniel Nestel** / Director
