

We vote in Governments to have sensible decisions, made for present need and plans for the future security and health of this country not to observe them selling off to the highest overseas bidder or potential polluter.

They are also voted in to take notice of the electorate not to bow to the highest bidder for short term gain.

Not maintaining current ocean sanctuaries affects the future of everybody as fish stocks will be eliminated for future generations. Stop the nonsense now, no to trawlers and no to ocean pollution and degradation .

Lyn Stirling
