

It's a simple evidentiary equation:

Life on the planet began in the oceans.

If the ecology of the ocean dies, the planet eventually follows ...

Thus; protecting a healthy sanctuary within the ocean's ecology provides increasing insurance for the survival of the planet, life, and human beings ... therefore in the interests of self-preservation, please Protect the Marine Ecological Environment.

Best Regards,

Tim Winton-Brown

Possum Creek, NSW, 2479.
