

Mr Turnbull

We are all very aware of your connections to big business and I believe you actively pressure policies that favour them. There is one reason and one reason only you would reverse the marine sanctuaries and that is to allow big business to heavily fish these areas.

Did you learn nothing from the last election? You got absolutely hammered in the Tasmanian electorate for your support of the factory trawler operating in our local seas. It was not a scare campaign by Labour over medicare. I actually think you know this but you just go along with your nonsense.

Don't do it. Your losing so many long term Lib supporters like my self. I felt so happy to change my vote for the first time at the last election. Please find another area you can help your mates that does not hurt the environment so much.

Finally I would like to give you a thought. Just because a company comes to Australia to fish in our oceans and does the right thing should we still support them if they have criminal convictions from work they have done in other oceans? We certainly have similar policies to our forest industry so how can our oceans be treated differently? It actually should be stricter, it's easier to count trees than fish..... right?
