

Please don't cut back the protection of our oceans, our precious marine life and flora and fauna. Australia has the most unique marine life and plants as documented by David Attenborough. Please do not be a world leader in winding back protections for our Australian oceans and her wildlife.

Please stop large scale trawling that destroys so many innocent animals like dugongs, dolphins, turtles and baby sharks that get caught up and killed in their brutal nets. Please have pity.

Please, please, reverse your decision to cut back protecting 50% of our oceans and the beautiful life it sustains.

This has huge implications on our environment and our planet and Australia's strong reputation as a protector not a destroyer.

yours sincerely,
Lydia Param
