

Dear Sir,

Please protect our established marine parks from de-listing as it is a proven fact that such marine parks:

1.../ Increase fish sizes in surrounding ocean areas.

2.../ Add to the important biodiversity off all marine environments.

3.../ Give protection of fish breeding areas.

4.../ You may not know this but fish are intelligent creatures as I observed many years ago in my diving days, and will soon depart from an area where they are continually hunted.

I could go on and on, however you get the drift of what I am saying.

Yours faithfully

Ray Welsh
