

Dear Tony

This is outrageously small minded thinking to say the least ,we have the problem here over fished .

Sustainable fishing is a priority of the highest degree , to have marine food for ever your legislation implemented 5 yrs ago was dead on the money with good foresight.

I'm totally disappointed in this government when will humans realise when the fish are gone the rivers poisoned and the trees no more that you cannot eat money .

I'm 100% against this stop "NOW"
