

To Management Planning,

We do not want to be known for being the global leaders in winding back marine protection. We want to be known as global thought leaders and lead by example by being innovative custodians of the planet.

Please DO NOT wind back the protection for our marine parks. They are parks for a reason. Focus your efforts on protecting what is special and unique about Australia and don't drag us down to third world level by winding back the protection and destroying what we have, making Australia a feral 'free for all' country.
