

We live in the most unique island nation in the world yet our government? seems hell bent on allowing the destruction of this irreplaceable land & surrounds of flora & fauna that can never be replicated, for whatever reason. (monetary?)

There is NO excuse for such irresponsible abandonment of our forefather's legacy. They're already allowing the rape & destruction of the land (& the adjacent coral reef) by Adani Mining. Now they want to open the avenue for attack by sea!! I'm heartbroken that such reckless disregard of our heritage could bring the demise of my following generation's unique heritage. We've seen just recently where the Greenpeace programme had to step in to stop the annihilation of a certain sea species because a neighbouring country had no means of monitoring their permit? to fish their seas by third world plunderers.....

WHAT DO WE HAVE TO DO TO SAVE OUR WORLD FOR OUR CHILDREN'S CHILDREN ?????
