

My wife and I are deeply disturbed with the proposed changes Australia's marine parks.

It is unthinkable in this day and age that Australia could become the world leader in reducing protection for the oceans.

It is frightening that it is proposed that in the Coral Sea alone the area currently placed in Marine National Parks will be halved.

This is unacceptable and call on you to reject the Government's plans to cut marine protection and retain the level of protection already afforded in Australia's Marine Park Network.

We thank you in anticipation of you taking a responsible approach and vote against these changes.
