

Dear Australian Government,

As a voting citizen of Australia I feel the urgent and very important need to voice my strong opposition to the idea of reducing the amount of care our country takes over our precious marine areas that surround our beautiful country.

This would be a very backward step, not a moving forward step, not innovative, not instructive, not respectful of our responsibility to protect the delicate eco balance in our oceans! There are much better ways we can sustain while bringing employment or whatever the reason is you want to do this on my behalf.

Please don't, not in my name, not on my behalf, at your very highest motivation, and not for irreversible short -term loss at your very lowest motivation.

Kind regards,  
Melody Jansz
