

My heart sinks when I hear about the latest backward step this government is taking to wreck the environment and our very future. As a little kid I used to canoe, swim and fish in places that are no longer teeming with fish or have dried up completely. What will be available for my grandchildren? I don't even imagine great grandchildren as the world is changing. Keep up the good work lefties. Even if I don't agree with everything you do you'll get my vote if you defend the seas and help get rid of coal. Cheers Jillian Rosman
