

These Marine Parks and Sanctuaries need our protection now more than ever. Trawling and overfishing has devastated prime fishing areas worldwide. We see fish species disappearing from over fishing. Why on earth would we want to disturb these places where fish are able to breed and be protected? This is the wrong way to profit from these areas. Tourism wants these areas pristine. Have you ever dived/snorkelled on holiday in an area that's over fished?

Sincerely,

The Barlow Family
