

I find it totally unbelievable that this government is becoming so backward in its thinking and policies that it will allow such a retrograde step as to diminish our wonderful marine park system.

In particular, trawling and longlining are so destructive to marine life and fish stock!

What sort of heritage and example will you be leaving for future generations?

Hoping you listen to ordinary citizens who vote for you and are supposed to be represented by you (or no longer maybe!) -not just those hoping to expand their wealth!

Sincerely,

Sandra Bowden
