

I think it a little crazy to lessen our marine parks when so many species are in danger from over fishing Marine life need a safe havens to bred to restock our oceans with fish rather than have mass extinction through miss manage our vital reserves Please do not make Australia 's marine sanctuaries any smaller Its in the worlds into protect marine diversity of life for now and the future. We as a nation need to do more to more to protect bio diversity When species die out there no bringing them back So do what's right for our marine diversity by retaining current size of our marine parks or even possibly making them bigger and more of them . yours with concern for life on earth. Robert
