

To whom it may concern,

I hold that, the more a government ignores climate change, animal welfare, ecosystems and environmental destruction is to its detriment. The world belongs to all of us and we have a duty to protect it from genocide. Each and every one of us has a right to enjoy the beautiful oceans, land and all that is in it and on it. An example of ignoring climate change is the Great Barrier Reef and what the mines do to the habitat of Koalas and other species. We all have to act NOW
