

I am Writing to you in regards to the proposed slashing of marine parks in Australian waters.

I can not believe that our government is trying to cut Marine Parks by almost half in some locations.

We need Marine Parks today more than ever !

with fish stocks declining globally and pollution increasing on a massive scale,

we need to look after our oceans for future generations.

We need to stop raping and pillaging the oceans for short term gain!

No reduction in Marine Park sizes!

Greed will cost the Earth!
