

Dear Sir/Madam

I find it disappointing when the previous government conducted extensive community consultation which I and my wife participated and which helped determine the marine sanctuaries that were later established AND the current government simply ignores and commences to disassemble those sanctuaries and marine parks.

I am a marine biologist by qualification and you guys have to stop thinking like a developing country just interested in tonight's meal - or today's dollar. Think for the future, not now. That's what we elect government to do!

Yours,

Will Duiker
