

Dear Australian Government,

I am a very concerned Australian citizen and voter who has just learned that you intend/propose to cut the area of ocean protection by 50%. Our marine parks, oceans and waterways are already struggling due to natural disasters, illegal fishing, nutrients run off & agricultural/industrial chemicals pollution, oil spills, overfishing, CO2 levels rising in the oceans etc.

Please, for humanity's sake and the sake of the creatures living in the oceans, increase or at the very least, maintain the current area of ocean protected.

Yours very sincerely,

Lorraine Robins
