

To the Minister for Environment & Water.

We would like to express our concern on hearing of possible cut-backs to our Marine National Parks, of up to 50%. Surely not!!

In this day & age we need a government able to leave a legacy of far-sightedness, regardless of commercial pressures.

We surely don't need a government that can wilfully dis-regard the concerns of its citizens for the long term care of our planet .

Sincerely,

June Geoff Fischer
