

Dear Sirs,

A big NO to the winding back of protections for our oceans.

As an example go back to when we were world leaders in marine protection for our oceans.

Re instate all of the Osprey Reef. We don't need to allow mid water trawlers and longlining to ruin the reef and the marine life.

Governments should not be taking a backward step in conservation, especially something that was in place and was so good for our oceans and marine life. We need to conserve for our future and the future of our children.
