

Dear Minister for Environment and Water, My name is Kajol Eagle and I am one of many Australians who care about our environment.

Your parties idea to halve the area of protected Australian waters are alarming and dismaying.

Considering we are the only continent surrounded by water, and what lies in the water is not only a food source but an amazing ecosystem that hosts thousands upon thousands of beautiful plants and creatures.

We are lucky to be the guardians to this amazing ecosystem and the habitat in which they live in.

To halve the protected area of water will not only be detrimental to the environment, it will be detrimental to our world if we cannot protect and maintain the ecosystem that is not only beneficial to Australia, but to the world.

So I ask of you to please reconsider your decision to halve the area of protected waters and maintain the high standards of conservation.

Thank you

Kajol Eagle
