

Notice to the Federal Government on Ocean Environment Protection:

1. It makes no sense to destroy and not protect environment, including the ocean environment.
2. Think of future life for generations.
3. We do not need to exploit and destroy for short term use and profits.
4. Protected Ocean Environment is worth far more than any dollar or forced end game use.
5. Have some sense and do not go backwards by stopping protections.
6. Save the magnificence, not for exploitation and profit.
7. Remember the 80,000 year old tribes here that preserved it all for so long by working with nature and the environment without destruction. There is no reason for us to do a lot worse.
8. We are seriously going wrong to destroy it all without protection, especially in such a short time.
9. Think of so much life, including our own, that should survive by keeping Ocean Environment Protection.
10. KEEP OCEAN ENVIRONMENT PROTECTIONS!

Thank you, Jerry Cook, age 77 and lifetime surfer. I surf with dolphins quite often.
