

To the Australian Government - as an Australian and a voter, I call upon you to retain all protections made in marine areas, and indeed , to introduce more! Protections must be made for our future on this planet to be sustainable, and should always remain secure - not subject to behind the scenes removal whenever a government wishes to placate and enrich an interested industry. This makes a mockery of government assurances, which , as every Australian is fast becoming aware, are nothing more than temporary public relations ! I ask you to have the backbone to genuinely protect the future of our environment and PERMANENTLY keep our marine protection areas in place. Protection is the duty of the government - not the abrogation of responsibility !!!!! I remain a very concerned voter with many friends - Elris Mendoza-Finch
