

It is inconceivable that in this day and age, Australia has a government who is actually winding back ocean protection. Science and technology develop at an astounding pace while our government (ie power) is medieval in practice.

It is time to lift your eyes above your navel and let your minds reach a broader plane. The case is simple. Be guided by scientists and CARE for the planet - dont RAPE IT! It is already in a terrible state.

May common sense and morality be with you

Jan Hodge
