

I am very concerned to hear of a proposal to cut the area currently reserved as marine parks in Australia. I understand it has been proposed that considerable areas of Marion , Espret, Shark and Vema Reefs and the Coral Sea would, under this proposal, be taken from Australian marine parks, reducing their size by half.

This would be a disaster for the future of the ocean and a black mark internationally for Australia.

I urge you to reconsider this proposal.

Sincerely,

Jan Harper  
Port Melbourne
