

To Whom it may concern

I am writing to express my deep concern about proposals to reduce the size of areas of coastal waters protected as part of Marine Parks.

You have only to recall the permanent damage done to Canada's Atlantic fisheries when cod stocks were allowed to diminish below the point of no return, due to over fishing and a lack of Government regulation. The eco systems in our marine areas are precious to sustaining all sorts of life, and they are irreplaceable. I therefore urge the Government to not allow these proposed changes to be made.

Regards
