

To whom it may concern. As a former born and bred resident of the Whitsunday's, who intends to move back to the region I'm deeply concerned that you intend to wind back the Marine Park protections that were put in place. As someone who used to work on farms in the region I understand the work and effort my farming bosses were and are undertaking to reduce the amount of harm that farming practices have on the reef. I am stunned that a constituency that votes for the National Party does all this work to protect our reef and waterways, then you people on the other hand want to undo that good work for what reason exactly.
