

Marine Parks are Sacrosanct.

Members are paid well to represent the wants of the people and foremost amongst their wants is a pristine sustainable environment for them to enjoy their futures. With unsustainability dogging most of the world's oceans, Australia needs to be a leader in promoting the health and well being of its sovereign patch of waters. To let Multinationals, whose creed is unfettered greed, rape and pillage what previous generations have enjoyed be destroyed by poor corrupted decisions is a travesty that your grand children will not thank you for if you are party to this gross Malfeasance.
